

Forum Help

Forum Help

This section contains the help commands for using the forum effectively. Please take a moment to look through them. We welcome users to attach relevant photos and images, audio, and even video content related to the discussion content. We do insist that users abide by the rules and policies of this forum.

What is Boardcode?

Boardcode are special tags that will allow you to format your messages. Currently, Joomlaboard supports links, bold, italic, bold, "quoted" text, img, size, list and colored text. The tags are used as follows:

`[b]Bold[/b]` will produce **Bold**

`[i]Italic[/i]` will produce *Italic*

`[u]Underline[/u]` will produce Underline

`[size=4]Size[/size]` will produce **Size**

`[color=#FF0000]Red[/color]` will produce **Red**

`[img=425]link to image[/img]` will produce a image with a width off 425 pixels.

Please remember you can go to a maximum width of 425 pixels.

`[ul][li]item 1[/li][/ul]` will produce an unordered list, but please keep in mind you'll have to insert

the `[li][li]` tags around the list items. See example below.

`[ul][li]item 1[/li]`

`[li]item 2[/li]`

`[li]item 3[/li][ul]`

- item 1
- item 2
- item 3

The `[ol]` tag will produce a similar list, but ordered (with numbers):

`[ol][li]item 1[/li]
[li]item 2[/li]
[li]item 3[/li][ol]`

- item 1
- item 2
- item 3

`[url]http://www.yahoo.com[/url]` will produce <http://www.yahoo.com>

`[url=http://www.yahoo.com]Yahoo![/url]` will produce Yahoo!

`[quote]Quote[/quote]` will produce

Quote

`[code]some code here[/code]` will produce

Code:

```
//Some code here

while ($adversary=='Neo')

{

fork(agent_Smith);

}
```

How to attach videos and photos in our Forum?

You can attach videos and photos stored on other websites at our Forum. Our Forum supports more than 70 different videos, music and slides formats! This will add a new dimension of multi-media fun and interactivity here. The maximum width of a video or photo recommended here is 425 pixels. We use the latest technology to accept popular image and video formats at this website.

Attaching Images at our Forum

Once you login to our Forum, you can use the image tags `[img size=425][img]` to attach photos stored elsewhere into our discussion Forum! A picture speaks a thousand words. Show your audience what you meant by displaying a photo (or a few photos) in your discussion.

Example
to attach a photo stored on Flickr to our Forum.

http://farm1.static.flickr.com/31/60744923_864f0f521a.jpg (Aston Martin Vanquish 1024)

`[img size=425]http://farm1.static.flickr.com/31/60744923_864f0f521a.jpg[/img]`

Attaching Videos at our Forum

If a picture speaks a thousand words, a video will represent a million words. You can clearly express emotions and experiences with video. Our latest video plugin allows you to embed formats of online streaming videos, music and

slides from 70 web sites! These include the popular YouTube, Google Video, Yahoo Video, revenue sharing Revver, and many more!

It is very easy to use the video tags [video]video's url[/video]. Remove the space immediately after both [. The program is smart enough to know the type of video from the url.

Example

to attach a YouTube video to our Forum.

<http://www.youtube.com/watch?v=UM5yepZ21pl>

(The Matrix Trailer)

[video]<http://www.youtube.com/watch?v=UM5yepZ21pl>[/video]

[youtube:<http://www.youtube.com/watch?v=UM5yepZ21pl>]

Example to attach other videos to our Forum.

<http://video.animeepisodes.net/video/7f33062b-f98f-455b-b196-994600d929e0.htm>

(Dr Gray-Man Episode 34 from AnimeEpisodesNet)

Just try putting the video's URL between the 2 tags [video]video's url[/video].

[video]<http://video.animeepisodes.net/video/7f33062b-f98f-455b-b196-994600d929e0.htm>[/video]

More than 70 supported videos, music and slides formats!
